

STARK Greenland

STARK Greenland is based at the Greenland Harbor (*Grønlandshavn*) in Aalborg Øst and is part of a nationwide chain of professional suppliers of construction material to the Danish and Greenland markets. STARK is a part of the DT Group, Scandinavia's largest distributor of timber and construction material.

STARK Greenland has five outlets in Greenland: in Nuuk, Qaqortoq, Sisimiut, Ilulissat and Aasiaat. The STARK stores in Greenland are owned and operated by an independent Greenland-registered company, that submits annual accounts and pays taxes in Greenland.

STARK Greenland serves our many customers in Greenland and the Faroe Islands from modern contemporary offices and warehouse facilities, and the office at the Greenland Harbor purchases and supplies all the materials to the 5 STARK outlets in Greenland. Shipping costs to Greenland are significant, and our efficient logistics center packs and optimizes all deliveries with a focus on flexibility and meeting customer needs. A recent extension has included a covered packing center, where the packing of up to 6 flat racks and 10 containers can be carried out under a roofed area.

At STARK we strive to be recognized as the most professional supplier of construction material, while at the same time focusing on ensuring the best possible working conditions for our employees. The working environment is an important parameter at STARK and the work place at the Greenland Harbor has been awarded a green Smiley by the Danish Working Environment Authority (*Arbejdstilsynet*), recognizing that security, work environment, indoor climate and ergonomic factors all meet the Authority's standards.

From its strategic location at the Greenland Harbor, STARK Greenland is ready to handle and optimize your deliveries with an efficient, experienced organization and the best logistics solutions in the market.

See you next time at STARK
